

Passing Around Objects

What is the output?

```
double a=0.03;  
double b=0.04;  
double c=b-a;  
System.out.println(c);
```

See Reference [here](#).

Passing Parameters

Primitive Values

- int, float, char, double

Immutables

- String, BigDecimal

Array of Primitives

int[]

Objects

- Custom Object

Mutable Strings

StringBuilder	StringBuffer
Thread Safe	Not Thread Safe
Synchronized	Not Synchronized
Since Java 1.0	Since Java 1.5
Slower	Faster
